Result-oriented Software Developer experienced in developing and implementing system solutions for optimizing software processes through automation and innovation. I have experience building and managing websites and web applications in corporate and startup environments using modern web technologies, and also using the agile method of development while practising SOLID principles. A highly adaptable, passionate learner with a strong work ethic and team collaboration skills.

## PROFESSIONAL EXPERIENCE

---

### Software Developer

Mar. 2020 - Present

Cavidel Limited | *Lagos State, Nigeria*

- Collaborated with an agile team to deliver features in a timely manner.
- Independently designed and developed a fleet management system with Laravel using good coding practices.
- Worked with a variety of environments and tools, learning required skills on the fly.
- Improved response time of existing software by refactoring the controllers and using eager loading when fetching queries.
- Reorganized page structure and lazy-loaded below-the-fold contents using AJAX and JQuery events.
- Optimized mailing and notification systems in existing software by using Laravel queues, Jobs and Schedules where necessary.
- Collaborated with a single teammate to design the architecture and develop Restful API endpoints for the company's mobile application.

### Web Developer

Jan. 2019 - Dec. 2019

Jetheights Services Limited | *Oyo State, Nigeria*

- Met with clients to discuss website design and function.
- Designed and built clients' website front-end.
- Designed and managed website back-end including database and server integration.
- Monitored the performance of live websites and troubleshoot content issues.
- Conducted WordPress training for clients.

## ADDITIONAL ACTIVITIES/BOOTCAMPS

---

### Software Developer Intern (Remote)

May. 2020 - Jul. 2020

Manifest & Company Inc. | *Ontario, Canada*

- Worked with a single teammate to create a task management web application using NodeJS.
- Independently developed a job listing micro-service for an existing user module.
- Worked in an agile structured system with daily SCRUM meetings to analyze the progress of projects being worked on.

### Finalist

Aug. 2019 - Oct. 2019

HNG Internship 6.0 | *Lagos State, Nigeria*

- Worked with a team of 20 developers to create a bot that saves messages from slack to a web application using PHP and NodeJS.
- Worked with a team of 15 developers using Laravel to develop a web application where everyone can share

information and facts about politicians are posted.
